

Christopher Alvarenga

Full-Stack Developer & AI Content Evaluator

El Salvador (Remote / LATAM) | christopheralvarenga64@gmail.com | +503 7452-0462 | linkedin.com/in/christopher-neftali-alvarenga-portillo-300444262 | github.com/christopherred22

PROFILE

Bilingual (Spanish native / English C1) full-stack developer and founder with hands-on experience building, testing, and refining AI-assisted products and workflows. Founder of a SaaS platform where I personally design prompts, evaluate AI-generated outputs, and iterate on quality across sales, support, and content flows. Strong attention to detail, structured evaluation habits from software QA work, and daily fluency with LLM tools (Claude, Claude Code, Cursor). Comfortable documenting findings, spotting error patterns, and translating them into actionable feedback for improving AI systems.

RELEVANT SKILLS

- Bilingual content evaluation: native-level Spanish, C1 English; sensitive to grammar, tone, and contextual accuracy in both languages
- Daily use of LLMs (Claude, Claude Code, Cursor) for building, prompting, and evaluating AI-generated content and code
- QA mindset: experience testing and debugging software, writing structured documentation, and following evaluation/process guidelines
- Process automation with n8n and Power Automate — designing rule-based workflows and updating them as requirements evolve
- Full-stack development: Next.js 14, TypeScript, React, Tailwind CSS, shadcn/ui, Supabase, Node.js — able to understand technical/AI-generated content critically
- Clear written communication in Spanish and English for documenting findings and recommendations

EXPERIENCE

Founder & Full-Stack Developer — Arkio.dev (SaaS CRM for Instagram-based businesses, LATAM) 2024 — Present

- Design and continuously evaluate AI-driven flows (24/7 sales bot) for accuracy, relevance, and clarity of AI-generated responses to prospects
- Review and refine content and messaging across the product (storefront, inventory, subscription flows) to ensure it meets quality and client-facing standards
- Manage sales pipeline and prospect evaluation, documenting findings and recommendations to guide product/roadmap decisions
- Own infrastructure and DNS/subdomain configuration (Vercel, Namecheap), applying the same attention to detail required for structured technical evaluation

Freelance Full-Stack Developer — Independent / Multiple Clients

2023 — Present

- Providence Insurance Agency (USA): built HTML email/lead-notification templates and validated content for accuracy and correct rendering before client delivery
- TuChance: designed and maintained Power Automate workflows, following and updating structured process guidelines
- IATicketSpace: developed a C# ticketing system, including QA and bug documentation cycles

Computer Science Engineering Student — Universidad Don Bosco

In progress

- Coursework and projects in software engineering, natural-language-adjacent technologies, and structured technical documentation

LANGUAGES

- Spanish — Native
- English — C1 (Advanced professional proficiency)

TOOLS

- Claude / Claude Code, Cursor, Next.js, TypeScript, React, Supabase, n8n, Power Automate, Git/GitHub, Vercel
